

Modular Wall
systems

SPECIFICATION

PREMIUM GRADE EXTERIOR PAINT- Dulux Weather Shield or similar

Guide only

OVERVIEW

Substrate	Modular Wall Systems Fibre cement panels
Paint type	Dulux Weather Shield or similar
Preparation required	None –clean and dry and free of contaminants
Coats required	2

Substrate	Modular Wall Systems Posts & Trims
Paint type	Dulux Weather Shield or similar
Preparation required	Scuff primed surface with a scotch bite pad (as per installation instructions), clean and dry and free of contaminants
Coats required	2

SURFACE PREPARATION

The surface to be painted must be clean, dry and free of contaminants including oxidization.

Repair any damaged area/s with appropriate filler, sand smooth and dust down prior to the application of paint.

Lightly scuff any primed metal components with a scotch bite pad. This is explained in detail in the installation instructions.

APPLICATION

We recommend applying the first coat with a roller. Cut in the sections that the roller missed with a brush prior to applying the second coat. Let the first 'cutting in' dry and apply a second 'cutting in' coat prior to the second and final roller coat.

On a large job a spray application maybe justified. Please see the paint manufacturer for advice on spray application.

Note: Surface preparations should remain the same for both roller and spray applications.
